Abstract

The abstract is your chance to describe your research in 150 to 250 words. Many authors write the abstract last, so it reflects the content accurately. It should provide enough detail for readers to decide whether or not to read the whole paper. Remove all extra information and then link your sentences to ensure that the information flows well, preferably in the following order: purpose; basic study design, methodology and techniques used; major findings; summary of your interpretations, conclusions, and implications. Confirm that there is consistency between the information presented in the abstract and in the paper. Above all it should be accurate. Don't promise more than your article delivers.

Keywords: oral reading skills; silent reading skills; pronunciation; fluency
